Call for Presentations Workshop

SYDNEY2019

ThoughtWorks®

A huge thank you 🙏

Who are we?

- Me (Raph)
- Aaron
- Michelle
- Sam
- Breana

Past DDD Agenda

Michael John Pena	Thiago Passos	Liz Gilleran	Hailey Martin
Blockchain, Cloud and DevOps	*Azure Functions Aren't Enterprisy, Are They?*	*5 Lessons for how Machine Learning Engineers can work with UX Designers*	*DevOps Is Everyone's Job*
			Georgie Luhur Cooke
			Your blog ≠ everyone else's blog

Changeover			

Klee Thomas	Jason Taylor	Caspar Yuill	Nelly Sattari
What Even Is Agile!?	*Clean Architecture with ASP.NET Core 2.1*	*How we know what we know: Using philosophy and ethnography to define the limits of AI*	*Fancy becoming a front-end developer? Get to know the tools and concepts first!*

Lunch			

Ben Cull	Jernej Kavka	Mark Boehm	Fiona McCawley
This Startup Life: A Developer's Mistakes and Tips	*Making unit tests simple again with .Net Core and EF Core*	*When the Devil is in the detail: understanding the Pareto Principle and how it applies to UX design*	*An Introduction to Elixir*
			Alex Swan
			Nobody asked you, Brenda

Today

- How are agendas selected
  - DDDs
  - Other conferences
- General Language techniques
- Working through titles and abstracts
- Preparing for talks

How agendas are created

Language Techniques

Clickbait....

New study: Coffee can kill you

But old studies say no

BY **MARY JO DILONARDO** - AUGUST 19, 2013

CNN | Health +

Up to 25 cups of coffee a day still safe for heart health, study says

By Amy Woodyatt, CNN

Updated 1534 GMT (2334 HKT) June 3, 2019

news.com.au

National | World | Lifestyle | Travel | Entertainment | Technology | Finance | Spo

science ▸ human body

Younger generations are growing horns in the back of their head

Up to half of all young people could be developing horn-like growths in the backs of their heads, startling Australian research suggests.
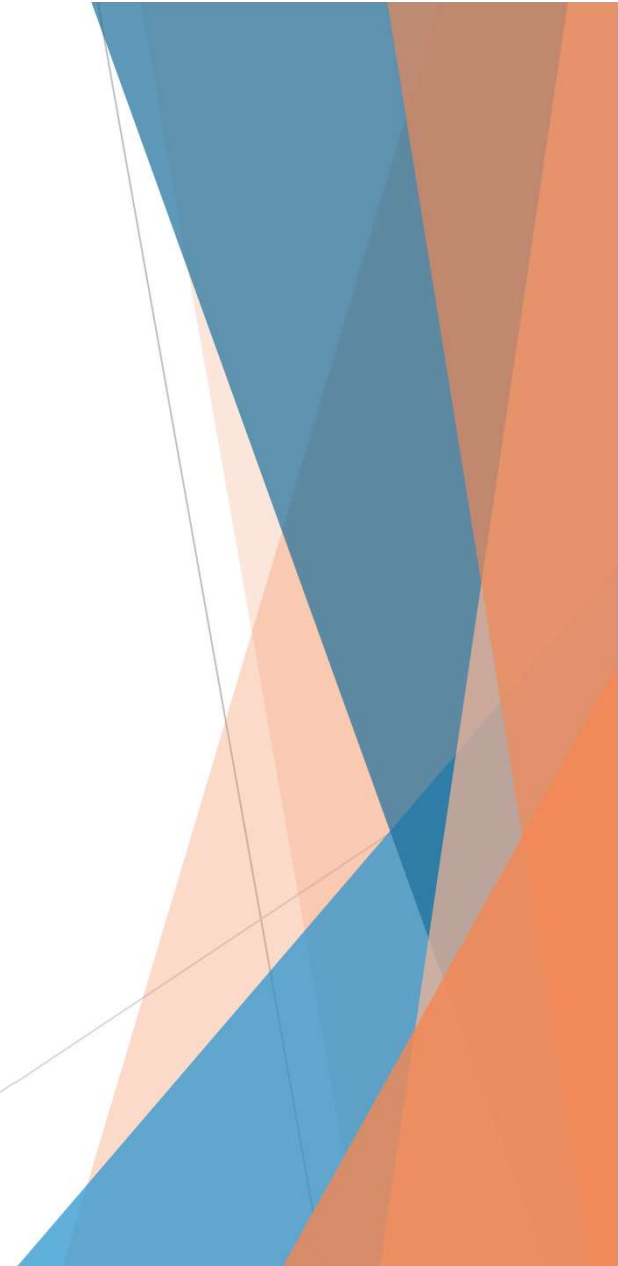

Language Techniques

- The Economy of Words
    - Brevity
    - Concise

- Example:
    - Choosing a microservices architecture taught us about domain driven design.
    - Choosing microservices taught us domain driven design.

Perspectives

OK, you try
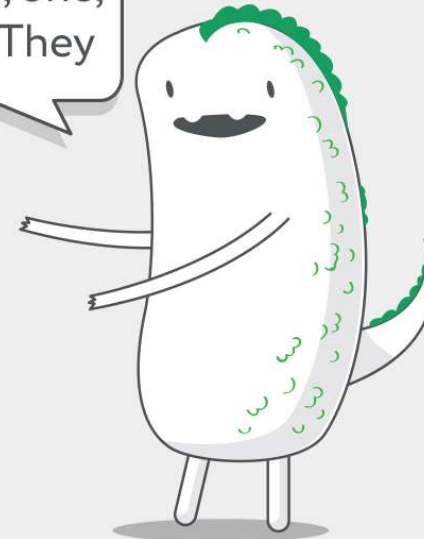

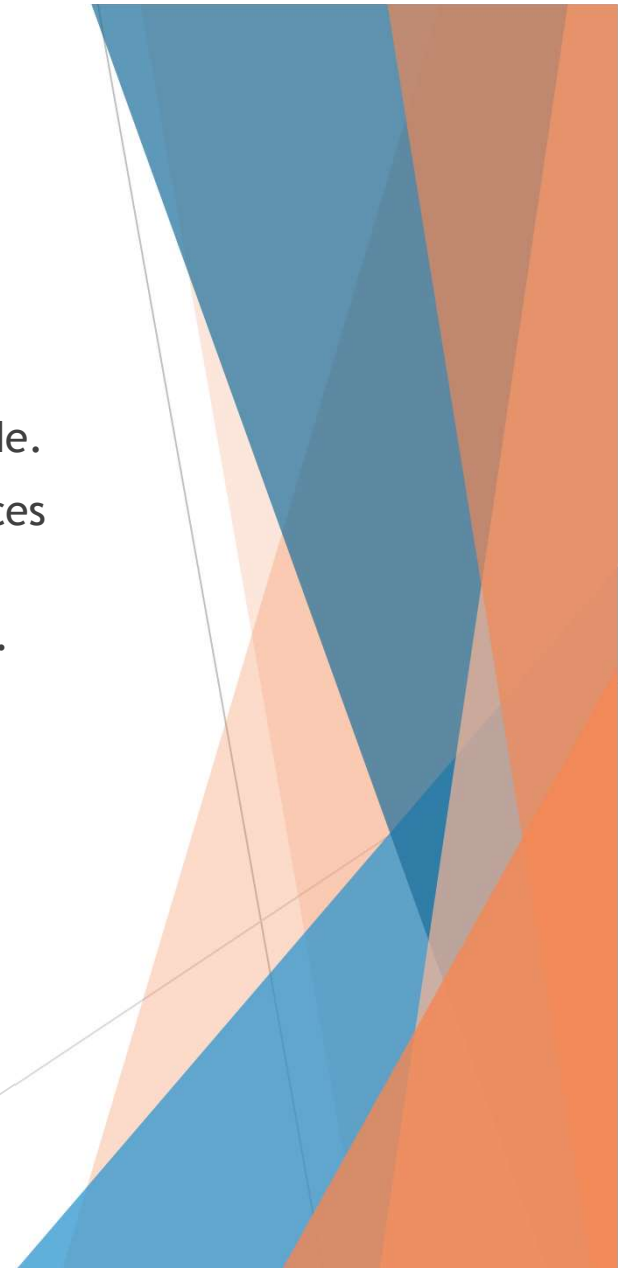

- ▶ Discovering unit testing made coding easier and minimised errors in my code.

- ▶ Starting with a monolithic architecture then slowly moving into microservices made me realise the importance of both types of architectures.

- ▶ Accessibility is important, not only for those who need it, but for everyone.

- ▶ Design thinking is a technique that's valuable for developers

The Submission

- What to submit a talk on?
- You don't have to prepare for the whole talk
- Get a peer review
- There will be rejections
  - It happens to everyone

# The Submission

- The Title
  - People will read
  - Grab their attention (but don't be click-baity!)
- The Abstract
  - The longer it is, the less it's read
  - Highlight why **you** are the right person to give this talk

# Common patterns (non exhaustive)

- Asking a question
  - What do microservices really look like in prod?
- A friendly challenge to the audience
  - Stop mocking, start testing
- A play on words
  - Docker FROM scratch
- 'From the trenches'
  - DDD from the trenches
- Personal talks
  - Overcoming fear, anxiety and doubt as a developer
- Technology: sub-title
  - Blockchain: More than cryptocurrency!

Common patterns (non exhaustive)

- Asking a question
  - How would you get started with Docker?
- A friendly challenge to the audience
  - Zero to hero with Docker in 1 hour
- A play on words
  - Docker FROM scratch
- 'From the trenches'
  - Docker from the trenches
- Personal talks
  - How I became brave enough to use Docker
- Technology: sub title
  - Docker: Not just containers!

You try

Congratulations!
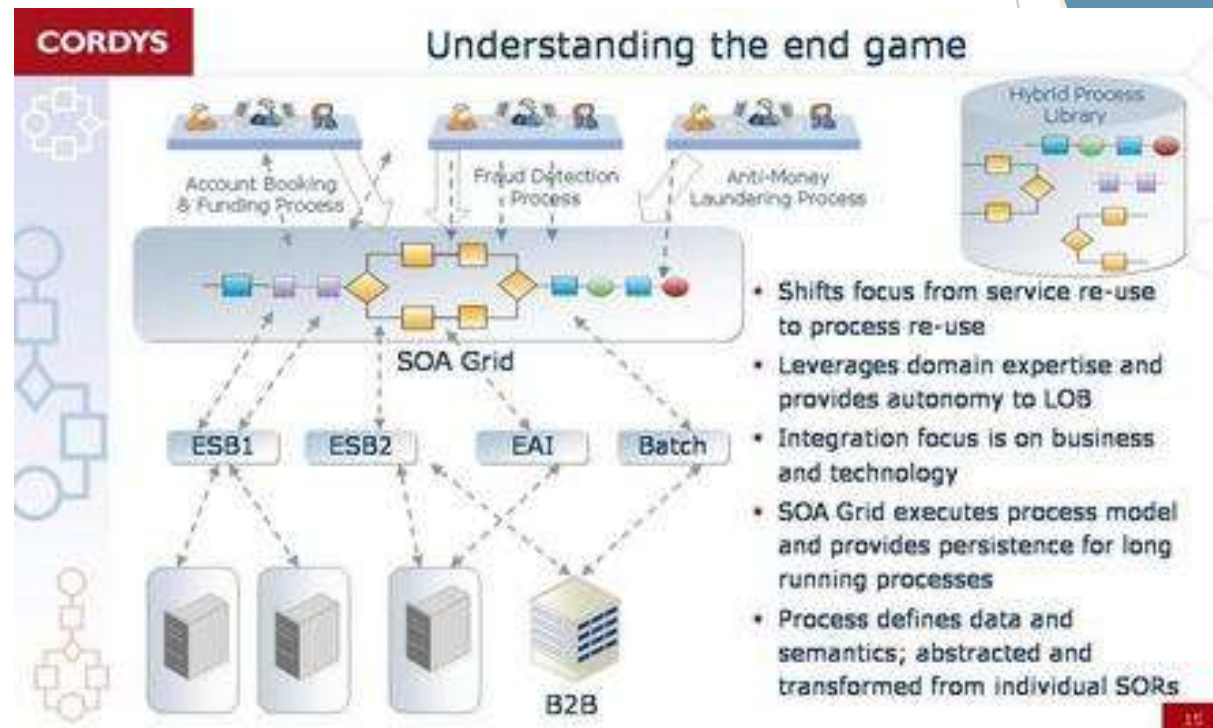

Preparing

- Fill your gaps in knowledge first

- Brainstorm everything

- Work on your points

- Memorise the introduction and conclusion

- Always about the audience

  - A call to action

  - Inspired?

  - Curious?

Visual Aids

- PowerPoint shortcuts
- Live code – beware
- Memes, jokes

CORDYS

Understanding the end game

Account Booking & Funding Process

Fraud Detection Process

Anti-Money Laundering Process

Hybrid Process Library

SOA Grid

ESB1   ESB2   EAI   Batch

B2B

- Shifts focus from service re-use to process re-use
- Leverages domain expertise and provides autonomy to LOB
- Integration focus is on business and technology
- SOA Grid executes process model and provides persistence for long running processes
- Process defines data and semantics; abstracted and transformed from individual SORs

Practice

- With an external display
- Speak with your stomach
- 15-20 minutes slots
- Practice drink breaks
- Record yourself

On the day

- Relax
- Remember to turn off notifications
- Enlarge and set text editor to proper fonts
- Have fun!

Practice

Important Dates

Sunday
